Threshold

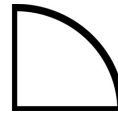

*finished on two long sides

Seat

20"

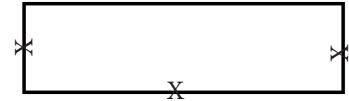

Shelf

10"

13" /
18"

Bench

50" / 72"

Using a solid piece for a shower curb offers several advantages:

- Structural Integrity: a solid piece 3/4" thick can support better the weight of shower doors, glass panels and other fixtures to ensure a longer term structural integrity.
- Waterproofing: a solid shower curb acts as a barrier to prevent water from overflowing from the shower area to the adjacent area. Tiling a curb will have grout joints that are prone to water penetration over time, a solid curb piece eliminates this.
- Easier Cleaning & Maintenance: with a smooth continuous surface there are no grout joints where dirt, soap scum, and mold can accumulate.
- Aesthetics: solid curbs are a more polished and refined look to complete a bathroom remodel. They can be chosen to match the tile or compliment it including another design element.
